

Incident Report

Record Number: INC-c2260a2

Report Author: Commander Amelia Reed, First Officer
- SPNS Arcturus

Report Date: 11/16/2491

Incident Status: Resolved

Short Description: Power Outage & Rodent Infestation

TO: Captain Virgil

Crew members involved:

Lieutenant Junior Grade Steon Blight

Lieutenant Commander Eleanor Keener

Lieutenant Commander Aryxovexs

Location:

Maintenance corridor B-4

Incident details:

At approx. 1150 hours, a power issue was detected near Chief Technical Officer Osiris' quarters. Junior Technical Officer Steon Blight responded and began maintenance in corridor B-4. Upon further exploration of the corridor, 20 genetically modified rodents were discovered near an air vent. Officer Blight proceeded to contact Chief Engineer Eleanor Keener and Second Officer Aryxovexs for advice on how to proceed. Chief Engineer Keener offered to eradicate the rodents using chemical traps. Officer Blight recommended they use fire instead to prevent chemical residue. Officer Blight then used a personal flamethrower to set fire to the rodents. Second Officer Aryxovexs made his way to the vents himself and proceeded to remove and eat the charred rats. Investigation of the corridor after the incident revealed burn marks and hair.
